NEW//COLLECTION

WHEN THE LIGHT SOURCE IS AT THE CENTER OF THE PROJECT

Interia presents a range of innovative products. The new collection traces the product tradition of Interia but in evolutionary terms. They are characterized by a subtle and timeless beauty, expression of a well defined aesthetic research. The new products represent a journey into the world of lighting in soft shapes, innovative materials and a color palette characterized by dense and natural finishes. Great attention to the light bulb, which reinterpreted in creative form acquires centrality in the project.
